

ALL OF HEALTHCARE WILL BE DIGITALLY DRIVEN

Healthcare's future products – including medical devices, drugs, combination products, wearables, implantables, Software as a Medical Device and more – will all be digitally driven.

If you want to become a next-generation disruptive leader in healthcare, you need to be working in digital health now.

There's no better place to get deep digital health experience than with BrightInsight.

We are a Silicon Valley startup backed by top VCs that provides the leading global regulated IoT platform for the world's top biopharma and medtech companies.

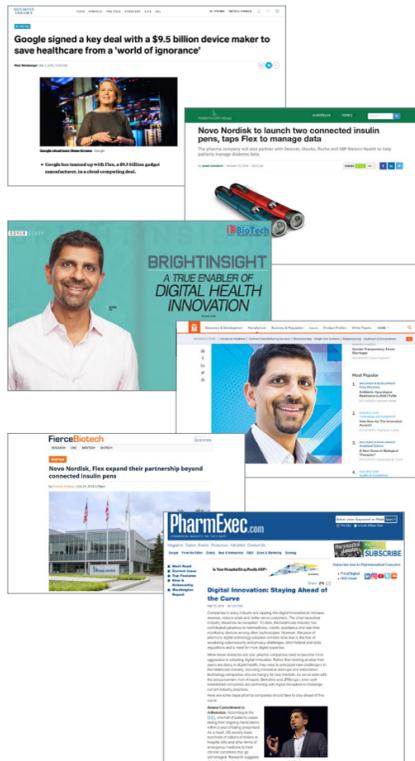

We are on a mission to accelerate regulated digital health innovation for our biopharma and medtech customers. Our vision is to transform patient outcomes globally by bringing the power of digital technology to healthcare.

OUR ROCKETSHIP SUCCESS

IN THE NEWS

- FierceBiotech**: Novo Nordisk, Flex [BrightInsight] expand their partnership beyond connected insulin pens
- PharmExec.com**: Digital Innovation: Staying Ahead of the Curve

"At my previous biopharma company, I was working on one specific product and the software I worked on took several years to get to the market. At BrightInsight I am working on 2-3 different customer projects at any given time that span different areas – from oncology to diabetes to obesity – which keep the days super interesting. The products I'm working on are also making their way into the market, which is really rewarding."
